Technical Skills

Programming & Backend: Java, Spring Boot, Microservices, REST APIs, JDBC, JPA

Databases : Cassandra, SQL

DevOps & Tools: Docker, Kubernetes, Maven, Git, Git CI/CD

Core Concepts: Data Structures, Algorithms, OOPs, LLD, Design Patterns, DBMS, OS

Experience

Thales DIS

Noida, Uttar Pradesh

Software Development Engineer II

Aug 2024 – Present

- Led a **Quarkus IT POC** and migrated all microservices to **@QuarkusTest**, reducing test execution time by **25%**.
- Built a **Cassandra LWT** lease mechanism for **single-pod** task execution, eliminating duplicate processing by **100%**.
- Designed and executed **cherry-pick automation**, reducing manual effort by **60%** and accelerating code integration.
- Automated order cancellations using Java thread scheduler, eliminating manual intervention by **80%**.
- Managed SmartService implementation, automating **4G-to-5G SIM transformations**, benefiting **10M+ users**.
- Processed **10M+ Cassandra records** using **Spark** to generate CSV reports of customer card counts for analytics.
- Migrated microservices to **Git-based CI/CD**, cutting deployment time by **35%** and improving reliability.

Software Development Engineer I

Aug 2023 – Aug 2024

- Created APIs for fetching **transaction logs**, enabling **50% faster** data retrieval.
- Enhanced a **resilient retry mechanism**, improving API reliability and increasing success rate by **40%**.
- Engineered a **Cassandra-based** lease model, ensuring **80% order update accuracy** across microservices.
- Automated SIM service file clearing, reducing manual effort by **80%**.
- Implemented **username** linking to associate orders with users via auth tokens, improving **filtering efficiency by 50%** and **visibility by 40%**.

Software Development Intern

Feb 2023 – Aug 2023

- Developed MSISDN conversion logic with **100% encryption**, improving **data security and compliance**.
- Enabled APDU tracking using **LogAPDU**, reducing **verification time by 60%** and improving **accuracy**.

Projects

Healthcare System | *Java, Spring Boot, Cassandra, Docker, Kafka* | [Source Code](#)

- Developed a healthcare **microservices** platform supporting **authentication, scheduling, and notifications**.
- Implemented **circuit breaker** and **retry patterns** using **Spring Cloud Gateway** for fault tolerance.
- Built **JWT-based authentication** and **API gateway routing** with centralized security filters.
- Designed **event-driven workflows** using **Apache Kafka** for **asynchronous notifications**.
- Automated daily statistics aggregation using **Spring schedulers** and **Cassandra**.
- Containerized microservices using **Docker** with centralized **configuration management** for scalable deployments.

Achievements

- **1275 (PUPIL)** on Codeforces: [rajat_1902](#)
- **6-star** on HackerRank: [RKS_07](#)
- **Top 13%** on LeetCode: : [rajat_1902](#)
- **4-star (1853)** on CodeChef: [rajat_1902](#)
- Won the **COTA Hackathon** at Thales by automating tombstone tracking, eliminating manual effort by **100%**.
- Ranked **1,792nd out of 30,000+** in LeetCode Weekly Contest 437, placing in the **top 6%** globally.
- Achieved ranks **2,236th**, **2,730th**, and **2,763rd** on Codeforces among **11K+**, **17K+**, and **24K+** participants.
- Secured **141st** and **155th** positions in CodeChef Starters 15 and 28, outperforming **7,000+** competitors.
- Ranked **under 3,000 globally** in HackerRank problem solving and among the **top 10** all-time in college.
- Solved **1,500+** data structures and algorithms problems across competitive programming platforms.

Education

Jaypee Institute of Information Technology

Aug. 2019 – May 2023

B.Tech in Information Technology

Noida, Uttar Pradesh
